DOT HAPPY - ISSUE #18 - 30Jul81

Dot Happy is a gamezine dedicated to the play of postal Diplomacy. Diplomacy is a war game invented by Allan Calhamer and presently owned by the Avalon Hill Game Company.

Dot Happy is published monthly by Allen Wells (phone: (617) 879-2183) for the subscription rate of \$.25 per issue. Game fees are \$5.00 with a \$5.00 refundable NMR deposit. There are presently no game openings. House rules are available on request, just send a SASE. Subscriptions are regarded as a lump sum out of which issue cost is taken, so if rates do change present subscriptions will be affected.

Hello!

A few interesting bits of news this issue. The first is something you probably haven't noticed above. The subscription price of DH is down to 25 cents per issue, at least temporarily. DH has shrunk considerably, and this price reflects this. If the issue size increases again, the price will rise again.

Will DH increase in size? I don't know. I am right now in the process of changing jobs. By the next issue, I will probably be working at a new place. I will know where by the time you get this. Needless to say, the change will impact my schedule tremendously, and I don't know what effect that will have on my time. More on this later.

As was mentioned last issue, this issue is one week late to allow for Origins/Diplocon last weekend. I had the pleasure of seeing many of you there, to those I did not, maybe next year. More on this later too.

This Issue:

The format of this issue is:

- 2) - Ramblings
- Games
- 4) - Daddy Warbucks
- 4) - Junipero Serra
- 6) - Garden State

Ramblings

It's been quite a while since I have rambled on, but I have much to say this time, so here goes.

SUB RATES: As I mentioned last page, sub rates are reduced to 25 cents per issue, effective immediately. The sub rate will remain at this level unless DII grows to it's former size again. You are getting a warehouse zine at this point, so here's a warehouse price. To those people who are trading with me, if you want to continue to get DII, fine and dandy, but I certainly won't be insulted if you take your time and money elsewhere. For the present, new trades and subbers are not being encouraged.

ORIGINS: Arye and I went to Origins and had a pretty good time. This year I avoided the Fantasy Role Playing games (after some abysmal experiences at GenCon last year) and concentrated on Diplomacy (pick up games and the tournament) and playing Tiddlywinks. I also managed to get in a small amount of sightseeing. (I HIGHLY recommend seeing the Washington Temple to anyone who gets into the DC area. The Mormon Church has justified itself with that single piece of architecture alone. I have never seen any man-made structure that came close to combining the sheer impressiveness, beauty, and glory of the Washington Temple.)

I didn't do too bad in Diplocon. I got a two-way draw in the first round as France. The second round I got part of a 5-way draw as Turkey, despite being on the same board as "Liar Pearson". The second game was not as much fun as the first, though. The time constraints let to people looking to who could be cut out of the draw before the clock ran out rather than long-range goals. However, all in all I must applaud the "Committee of 1/2/3" and especially Mark Berch for a tournament well run. I have now run in tournaments under Berch, Robert Sacks (GenCon), and Jim Bumpus (Pacificon). I would rate them Diplocon (best), Pacificon, GenCon (pretty bad).

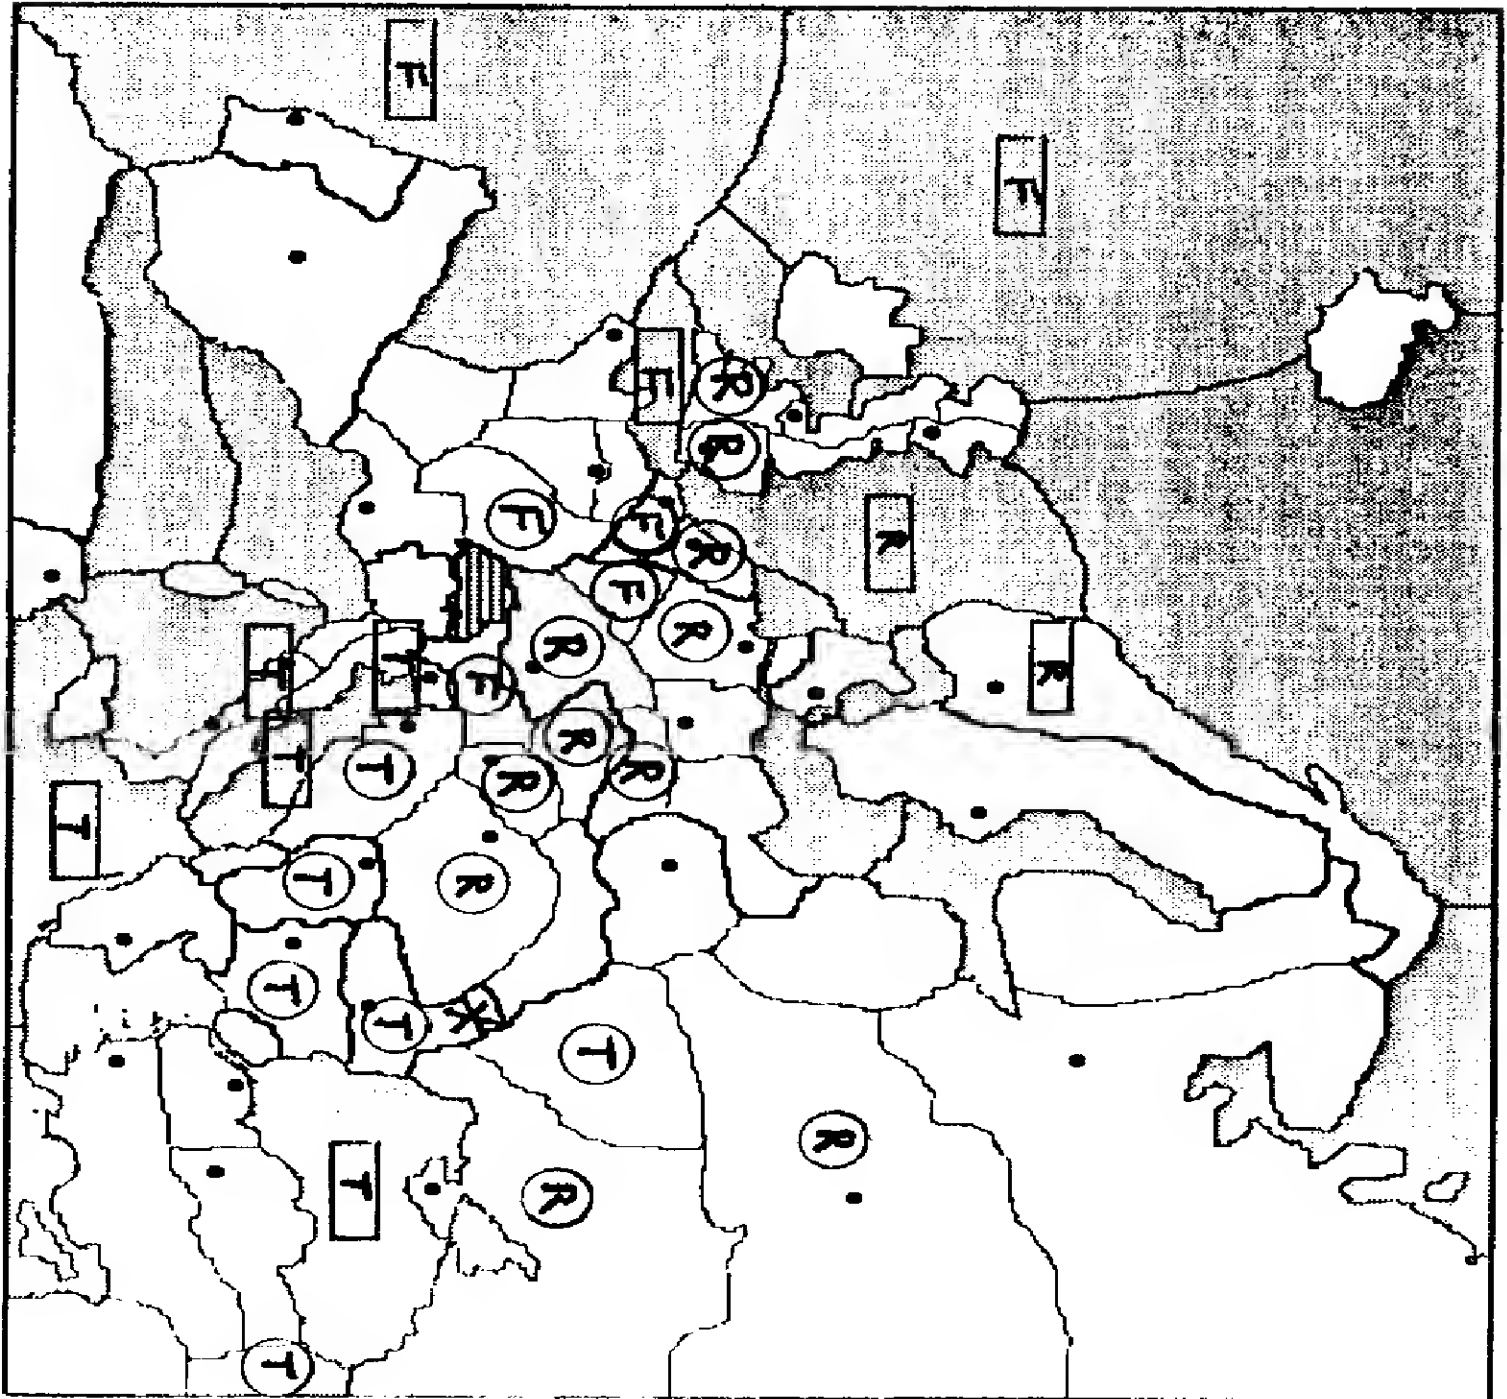

NEW JOB: Well, the interviewing is over. At this point I have two solid offers which I am quite torn between. Prime Computer (Natick) wants me to work for them in a team effort to develop a sophisticated Electronic Mail system to be incorporated, among other places, in their new word processing system they are starting development of. General Computer (Cambridge) is a computer arcade game company that creates new games, then licenses the games out to the big arcade companies. If any of you have ever played Ms. Pac Man or Super Missile Command, those are General Computer products. Normally I would not be interested in working at an arcade game company because all the work is done in assembler, but most of the work at General Computer is done in the language "C" on a 68000 based processor. By next issue I will know which it will be, in fact, I should be working at one or the other by then.

For those of you that are wondering, I will not be moving from my present address in any event (sigh!). I had hoped to be moving out to Silicon Valley this time, but the recession seems to have finally caught up with them, and most of the companies there aren't interested in relocating someone across the country when they have people to interview locally. So, I must endure MA for a while more (heavy sigh!).

temporarily closed due to overwhelming storms on the home-front. These storms have now passed and the re-conditioning and resettlement of the Post Office has now been completed. The re-opening of our postal service shall commence in early August. Please accept my apologies for not corresponding.

Russia-England: Your proposal sounds interesting - could you please relate more details as to your future plans.

Germany-Russia: You won't get your "ultimate revenge". I'll never understand why people hold long-term grudges. However, I must - and will - deal with life the way it is (you do hold this grudge), and not the way I want it to be. Thus, I will make every effort to destroy you as quickly as possible. You did a good job of harming my position in 81CG - and you did it at the expense of your own position. You burned me once, but in the future I will take into account your hatred for me. I won't hate you back - you aren't worth the trouble.

Melbourne: Great cheers for the emerging Great British Empire! The Aussies are looking forward to a European Continent completely stabilized by their Motherland.
